-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 1-3, 6-10, and 12-14 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 28, 2004.
2. Applicant's election without traverse of claims 4-5 and 11 in the reply filed on October 28, 2004 is acknowledged.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 4-5 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. Claim 4 recites the limitation "the flow circuit" in lines 2-3 and 4-5. There is insufficient antecedent basis for this limitation in the claim.

Claims 5 and 11 are rejected as depending from a rejected base claim.

Claim Rejections - 35 USC § 102/103

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

8. Claims 4-5 and 11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Vawter.

Vawter teaches a pump unit (20), and at least one of a filter unit (23, 24) and cooling unit (col. 5, lines 5-19). Regarding the apparatus being an "expansion module" having the intended use recited in the preamble, it is submitted that the limitation fails to breathe life and meaning into the claim, the claim does not rely on the preamble for completeness, and the recitation is one of intended use which fails to add structure to the "expansion module" itself. If it is applicant's position that the preamble adds structure to the claim, it is submitted that the apparatus of Vawter is capable of use as "an expansion module" between a rock working tool and a catch trough.

9. Claims 4-5 and 11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Shibuya et al.

Shibuya et al. teach a pump unit (4), and a filter unit (5). Regarding the apparatus being an "expansion module" having the intended use recited in the preamble, it is submitted that the limitation fails to breathe life and meaning into the claim, the claim does not rely on the preamble for completeness, and the recitation is one of intended use which fails to add structure to the "expansion module" itself. If it is applicant's position that the

preamble adds structure to the claim, it is submitted that the apparatus of Shibuya et al. is capable of use as "an expansion module" between a rock working tool and a catch trough.

10. Claims 4-5 and 11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Yamashita (JP P2001-138117). Yamashita teaches a pump unit (5), and a filter unit (18). Regarding the apparatus being an "expansion module" having the intended use recited in the preamble, it is submitted that the limitation fails to breathe life and meaning into the claim, the claim does not rely on the preamble for completeness, and the recitation is one of intended use which fails to add structure to the "expansion module" itself. If it is applicant's position that the preamble adds structure to the claim, it is submitted that the apparatus of Yamashita is capable of use as "an expansion module" between a rock working tool and a catch trough.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References are cited of interest to show the state of the art.
